-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over McGee US 6,393,468 in view of Lindemann US 6,799,155.

As per claims 1, and 6 McGee teaches an application to prompt customers to enter non-PIN data into dynamically generated web pages. McGee does not teach authentication of said application, (Col 6 lines 15-35).

Lindemann teaches use of a SIM to authenticate that the customer, or user is accessing the appropriate application, (Col 3 lines 4-20).

It would have been obvious to one of ordinary skill in the art to use the authentication of Lindemann with the application of McGee to prevent entry of data to an unauthorized program.

As per claims 2-5, 7-10, McGee does not teach smart cards, digital signatures, and certificates.

Lindemann teaches use of a SIM (smartcard), (Col 3 lines 4-6). Lindemann teaches that the smart card authenticates through use of digital signatures, including use of its own

private key, (Col 3 lines 14-20). Lindemann teaches that the smart card is assigned its own digital certificate by a certificate authority, (Col 2 lines 62-66).

It would have been obvious to one of ordinary skill in the art to use a smartcard of Lindemann with the system of McGee because the smartcard provides two-factor authentication to enhance security.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 2003/0191721 A1 teaches uses and properties of a smart card in line with the instant specification.
